

INTEROFFICE CORRESPONDENCE

DATE: October 10, 1994
TO: J. A. Ledford, Solar Pond Projects, Bldg. 080, X8673
FROM: T. d. Beckman, Solar Pond Projects, Bldg. 080, X8725 *T. d. Beckman*
SUBJECT: CRITERIA FOR MINIMALLY TREATED REMEDIATION WASTE -
TdB-045-94
DOE Order: 4700.1
Action: Confirmation of Criteria

We have incorporated the criteria developed by your staff (94-RF-08904, September 2, 1994) into the treatment plans for pond sludge and inventory pondcrete remediation wastes. Since those criteria were issued, however, our understanding of the project's data needs has evolved. Several technical discussions have occurred between Solar Pond Projects, Department of Energy, Engineering-Science, Inc., and Halliburton NUS have identified additional deliverables. To provide these deliverables, both our staffs must quickly incorporate the new requirements into our plans. In particular, I am concerned with incorporating physical and chemical testing requirements for soils, waste mixes, and liner mixes into subcontracts on the project's critical path.

Please provide a confirmation of the September criteria in light of recent developments and a statement of the additional requirements. I need this information by October 14 in order to initiate a modification of the treatability study subcontract. If you would like to discuss this further, please contact me or Leon Collins at extension 6968.
